Proper mat selection, placement and maintenance are keys to making your facility floors *safer, cleaner, and more comfortable* – which is our mission. The products in this document are general options based on hypothetical facilities in a generic facility category. For the most appropriate product recommendations, please request a site survey from your distributor sales representative or an M+A Matting representative. **A trained facility surveyor can make the best, safest mat recommendations tailored to your facility's/environment's specific flooring needs.**

Please note that the backing thickness and backing tread selection are as important as the mat selected, and M+A Matting representatives can help you specifically in this area. Please don't hesitate to reach out to us directly with questions. 800-665-5336 • customerservice@mamattng.ca.

+Hog Heaven mats are also available in modular tiles and linkable sections

^WaterHog products are available in tiles and roll goods for larger applications

\*Indicates logo/branded options are available for that mat
